

“Our staff now has a centralized tool that has made an enormous difference in how our coding and auditing specialists work. With iCodeRX we have a simple platform for inputting our data. In addition, we are confident we are working within our mandated regulations and maintaining records for required audits.”

—Supervisor, National Naval Medical Center, Bethesda Maryland

iCodeRX is DOMA's platform for cost-effective, uncomplicated on-site or remote coding and auditing. Incorrect coding and auditing can bring on enormous cash flow losses to your organization. Proper documentation with respect to current billing and coding practices can alleviate the problem and transform your business practices. This intuitive web-based application increases productivity in the medical coding process, delivers a configurable framework to easily manage workflow, affords multiple levels of access, and monitors coder productivity.

Our platform allows coding and auditing for:

- outpatient medical records
- clinical visits
- ambulatory procedure visits

Medical records and related documentation may include:

- provider progress notes
- abbreviated medical records
- diagnoses
- procedures
- consultations
- history and physical examinations
- laboratory
- pathology
- radiology
- nuclear medicine reports

Features

- Highest level of security and encryption in the industry
- Immediate deployment
- Simple, user-friendly web-based interface
- HIPAA compliant performance and audit reports
- Full-time access to data across multiple sites
- Real-time management of coding staff
- Flexible application integration
- Ability to monitor productivity
- Simple pricing model
- Tech support, help desk and administration services
- Online administrative tools

With iCodeRx, medical charts are scanned, indexed, and securely uploaded to our servers and routed to a coder's work queue for processing and submission to a dedicated hospital abstracting system. Behind the easy to use interface, iCodeRX utilizes sophisticated software to synchronize and enhance all aspects of coding and practice management while optimizing productivity, decreasing errors and managing ever-changing regulations.

iCodeRX is built on a secure, web-based repository (iVault) that can store and manage every document ever produced by your organization. iVault provides global access via a web browser for the retrieval and delivery of virtually any document. Thanks to iVault's three-tiered security and encryption, the integrity of corporate information is never compromised and documents remain invisible to those without proper clearance.

To request an iCodeRX or iVault demo or to learn more about DOMA's additional products and services, visit our web site at www.domaonline.com or call **757.306.4920**

Benefits

- Performance and productivity reports to identify coder accuracy and allow for tailored staff training and support
- Increased revenues by decreasing financial losses due to coding errors
- Maximized productivity with sophisticated tools that improve coder efficiency
- Improved workflow by reducing worker backlog and allowing multiple users to share the data and the workload
- Reduced time and cost associated with performing an audit
- Fast and easily generated audit reports based on existing template or selected parameters
