CASE STUDY

KFORCE®

KForce is an award-winning professional staffing and solutions firm that provides strategic partnership in the areas of Technology and Finance & Accounting services. Founded in 1962, KForce has 60 national offices, and over 23,000 employees.

CHALLENGE

KForce needing a system to effectively manage over 3,000 personnel files. With no software solution in place, they had no straightforward method of accessing any records already in a digital format. The costs associated with physically storing documents in addition to the high premium for office space meant that KForce needed a change.

SOLUTION

DOMA implemented the DOMA DX software platform as a cloud-based content management solution. Software was paired with DOMA's digital conversion services. DOMA's secure document scanning process helped KForce to immediately convert their records into an accessible, indexed format. DOMA DX was uniquely configured to meet KForce's needs; this included the delivery of automated workflow tasks designed to expedite the movement of personnel profiles to authorized HR staff for action.

BENEFITS

DOMA helped to migrate 28 filing cabinets to the Cloud, making room for 35 new employee cubicles. Six teams within the corporate HR department now collaborate through the DOMA DX Software. DX was integrated with KForce's existing HRIS system resulting in centralized, managed access to information. By migrating documents to DOMA's secure content services platform, KForce benefits from increased security and a significant reduction in paper storage.

POWERED BY TECH, DRIVEN BY PEOPLE

DOMA Technologies (DOMA) was founded in 2000 as a Cloud based document management company. Today DOMA serves a diverse range of Federal and Commercial customers with customized business solutions that include Digital Conversion Services, Cloud Services, and Health-care Information Services.

“THE TECHNOLOGY HAS ALLOWED US TO CONSOLIDATE AND GET RID OF PAPER EQUALING 3 STORIES HIGH. THE SPACE PREVIOUSLY ALLOCATED FOR STORAGE IS NOW BEING UTILIZED BY OVER 30 EMPLOYEES AS NEW OFFICE SPACE.”

KFORCE PROJECT MANAGER

DOMA replaced two on-premise data centers (Richmond, VA and Atlanta, GA) with a single, but fully redundant cloud infrastructure. DOMA completed the migration, and used the following AWS tools and services:

MIGRATION TOOLS:

- AWS Connector for VMWare
- AWS Server Migration Service
- AWS Direct Connect
- AWS Command Line Interface (CLI)

AWS SERVICES:

- AWS Virtual Private Cloud (VPC) with redundant subnets
- AWS Security Groups to restrict/allow certain access
- AWS Identity Access Management (IAM)
