

# **DOMA**

**TECHNOLOGIES**

## **CLOUD SERVICES**

DOMA provides scalable, cloud-based solutions designed to capture, manage, and provide access to data in a highly secure cloud environment.

**Highly  
Configurable**

**Accessible  
Anywhere**

**Improved  
Performance**

**Reliable &  
Secure**

**First to  
the Cloud**

## Leaders in Cloud Technology

Getting started with the Cloud can be hard, but DOMA can help you navigate the hard decisions. DOMA is a Select Consulting partner with Amazon Web Services (AWS), the world's most comprehensive and broadly adopted cloud platform, in order to deliver dynamic solutions that outpace other cloud platforms in innovation, security, and functionality. DOMA can help your organization architect an AWS cloud solution that meets your specific requirements. We'll assess and make recommendations on workloads that can be migrated to the Cloud. We'll develop an approach and a roadmap that will include the AWS services, consulting services, and managed services required for a successful project.

## DOMA Can Help Your Organization:

- Migrate your workloads to AWS
- Hybrid cloud with VMware Cloud on AWS (VMC on AWS)
- Managed Services
- Manage content with our SaaS based document/content management platform (powered by AWS)

***DOMA has complementary assessment offers to help organizations understand the risks and options for migrating to the cloud.***

## AMAZON WEB SERVICES

Amazon Web Services (AWS) is a secure cloud services platform, offering computing power, database storage, content delivery and other functionality to help businesses scale and grow. Millions of customers are currently leveraging AWS cloud products and solutions to build sophisticated applications with increased flexibility, scalability and reliability.

DOMA Technologies was founded in 2000 as a "cloud first" technology firm and is an AWS Select Consulting Partner, a Public Sector Partner, and a VMC on AWS Solution Competency Partner. DOMA has expertise and customers in the state, local, education, federal government, and commercial segments.

DOMA's offerings take advantage of the reliability, scalability, and security of AWS' global infrastructure whose compliances and authorizations include:

## Cloud Strategy & Migration Services

DOMA's Cloud Services can help you define your journey to the cloud with our proven methodology that is tailored to meet your business outcomes and maximize your results.

- Migrate your existing applications and infrastructure to the cloud from anywhere
- Build an AWS migration approach and methodology
- Plan "lift and shift" migrations using AWS infrastructure and migration services.
- Application modernization and re-platforming to help move towards cloud-native development for cost optimization and resiliency

## Windows Workloads on AWS

AWS offers a host of services and solutions to help scale your Windows workloads in the cloud – from minute-to-minute capacity changes and the simultaneous deployment of thousands of instances at once, to a variety of licensing options to make managing software work for you.

- 2x more Windows workloads run on AWS than the next leading cloud service provider
- Tailored programs help customers migrate their Windows and SQL server workloads
- AWS' Migration Acceleration Program (MAP) for Windows provides customers prescriptive guidance

## Windows Server Application Optimization

Windows Server applications also make great candidates for modernization in the cloud, and AWS offers the tools and services to enable an increase in agility and innovation through modern, cloud-native solutions.

- Greatly reduce infrastructure and licensing costs to better align your costs with usage, while also decreasing deployment and launch times
- 24x7 monitoring of all servers and complete infrastructure/environment
- Manage all infrastructure platform upgrades and growth
- Manage security and high availability (HA)

## VMware Cloud (VMC) on AWS

VMware Cloud on AWS is an integrated cloud offering jointly developed by AWS and VMware. You can deliver a highly scalable and secure service by migrating and extending your on-premises VMware vSphere-based environments to the AWS Cloud running on Amazon Elastic Compute Cloud (Amazon EC2).

- Consolidate & Migrate
- Data Center Extension
- Faster Disaster Recovery
- Next-generation Applications

# CERTIFICATIONS & SECURITY

DOMA has been in the managed services business since our founding 20 years ago. DOMA can manage your cloud infrastructure in a secure environment so that you can focus on running your business.

## GSA Contract Holder

### Prime Contract Holder:

- GSA Schedule 36 | Office and Document Solutions
- GSA Schedule 70 | Information Technology Professional Services

### Sub Contract Holder:

- T4NG | Total Technology Next Generation
- Eagle II | Department of Homeland Security

### Federal Certifications

Minority Owned Small Business

### State Certifications

Small Women and Minority Owned

## Cloud Leader in Compliance & Security

Our team is constantly in risk assessment mode. Data breaches, data loss, account hijacking, insecure APIs, denial of service, and malicious insiders are at the top of the compliance and security list of concerns and we prioritize efforts to mitigate those risks.
