Powered by Tech, Driven by People

DOMA Technologies (DOMA) was founded in 2000 as a Cloud based document management company. Today DOMA serves a diverse range of federal and commercial customers with customized business information solutions that include Cloud, Digital, and Healthcare services. DOMA specializes in creating holistic workflow solutions that simplify and automate business operations such as data capture, records/document retrieval, and electronic storage. These services, along with our DOMA Experience (DX) software platform, are designed to help support your organization's Digital Transformation journey. A considerable portfolio of government, healthcare, education, and commercial customers demonstrates that DOMA has the experience and infrastructure to deploy integrated solutions that make complex operations simple across a wide range of industries.

The DOMA Experience (DX) software is a highly customizable content services platform that allows for the intelligent capture, storage, and retrieval of both digital and physical documents. This scalable, secure platform utilizes optical character and barcode recognition, electronic forms capture, auto document classification, and more to help customers best leverage their data.

Customers Using Our Services and Software

At DOMA, we are solutions oriented and deeply connected to how technology can drive value. Our transaction-based pricing model and wide range of customized services mean that DOMA's solutions are flexible and scalable. We are seasoned pros when it comes to formulating solutions for a diverse range of customers. Whether you are dealing with large volumes of sensitive healthcare records or are a growing business that needs more control over how your documents are accessed and stored, DOMA has the expertise to help illuminate the way forward.

THE DOMA DIFFERENCE

Cutting-Edge Software

With DOMA's DX software platform you are never trapped with an inefficient legacy system. We charge by the transaction, not by the user or software version which means you're always getting the latest updates and features.

Focused on Results

Unlike many Business Process Outsourcing (BPO) vendors, we remain agile and customer focused. DOMA makes innovation a priority and we are consistently working to improve your experience and drive your growth.

The DOMA Experience

We created the DX platform with ease of use, scalability, and customized functionality in mind. It can be rapidly deployed and seamlessly integrated into current workflows.

- SaaS Platform Powered by AWS
- Content Ingest From All Digital & Physical Sources
- Barcode & Optical Character Recognition
- Transaction-Based Pricing Model
- Non-License Based
- Electronic Forms Capture
- Auto Document Classification
- Outlook Plugin
- REST API Integration
- Secure Fax Receiving/Sending

Customized Data Capture for Every Need

DOMA's digital solutions are tailor-made to fit your business' needs. We work with every customer individually to determine what fields of data need to be collected. We can then tailor the conversion process and our software to ensure the correct information is captured and made accessible. We can work with diverse records of every format at any size including:

Employee Records

Patient Records

Accounting & Finance Ledgers

Case/Contract Files

Student Transcripts
