DOCUMENT CONVERSION:

Scanning is the first step to enterprise-wide modernization. It is a key component in staying competitive and taking control of your business data. In fact, 46% of people who transition to a paper-lite office say it is the biggest single productivity improvement of their business process.

CLOUD CONTENT MANAGEMENT:

Every year the amount of data businesses generate is growing by over 65%. Capturing, storing, and analyzing this data is a common challenge for businesses. Cloud solutions provide a secure, scalable answer to the increasing volume of information your organization produce every year. Additionally, cloud technology offers deeper insight through hyper automation tools powered by artificial intelligence and machine learning supported OCR.

DIGITAL MAILROOM:

A mailroom outsourcing solution from DOMA ensures that the valuable data contained in your mail becomes a useful resource. Access your mail anytime, anywhere while also freeing up physical space, human labor, money, and resources.

ADDITIONAL SERVICES

DOMA's solutions are customized to meet your needs and can include data extraction, document redaction, workflow automation, a digital mobile forms app and more.
