DX ENGAGE PLATFORM

A SIMPLE PLATFORM WITH POWERFUL RESULTS

The DX Engage platform allows organizations to securely capture, manage, store, and collaborate with content enterprise-wide. DX Engage offers an ever-expanding suite of features, including:

- 24/7 access from any location via the Cloud
- Automated workflows that eliminate tedious processing tasks
- Intelligent document processing to identify and extract critical data
- Integration with key business systems via APIs

MODERNIZATION ROADMAP

DIGITIZATION

Turn paper or alternative media into meaningful digital files that comply with federal NARA mandates

CENTRALIZATION & COLLABORATION

Realize the benefits of the DOMA Engage platform and portfolio of microservices.

AUTOMATED PROCESSES

Make data usable with intelligent data capture and workflow automation. Extract data from structured & unstructured content and deliver it for downstream actions.

DATA INSIGHT & ANALYTICS

Data visualization offers actionable data insights. Drive positive outcomes by taking data & making it work for your decision-making.

ENTERPRISE INTEGRATION

Integrate with the processes, applications, and tools already within your environment. Leverage the Cloud where possible to create scalable & agile technology solutions.

DX ENGAGE MICROSERVICES

REALIZE THE TRUE POTENTIAL OF YOUR DATA

DOMA offers several powerful microservices, including:

Autonomous: Identify data & automate routine tasks

eSignature: Simplify signatures on both desktop & mobile platforms

Reveal: Uncover insights from unstructured data

PinPoint: Extract handwritten & typed text from standardized forms

Redact: Easily protect sensitive data

Translate: Language detection and translation for up to 75 languages
